ABOUT

The Vocational School of Campanhã (EPCampanhã) is a school located in Porto more specifically in the Campanhã parish. It's in a area with easy public transport access and with several greenspaces nearby.

LOCATED

The Vocational School of Campanhã (EPCampanhã) is a school located in Porto more specifically in the Campanhã parish. We are very close to the Porto's history center and some main points to the city

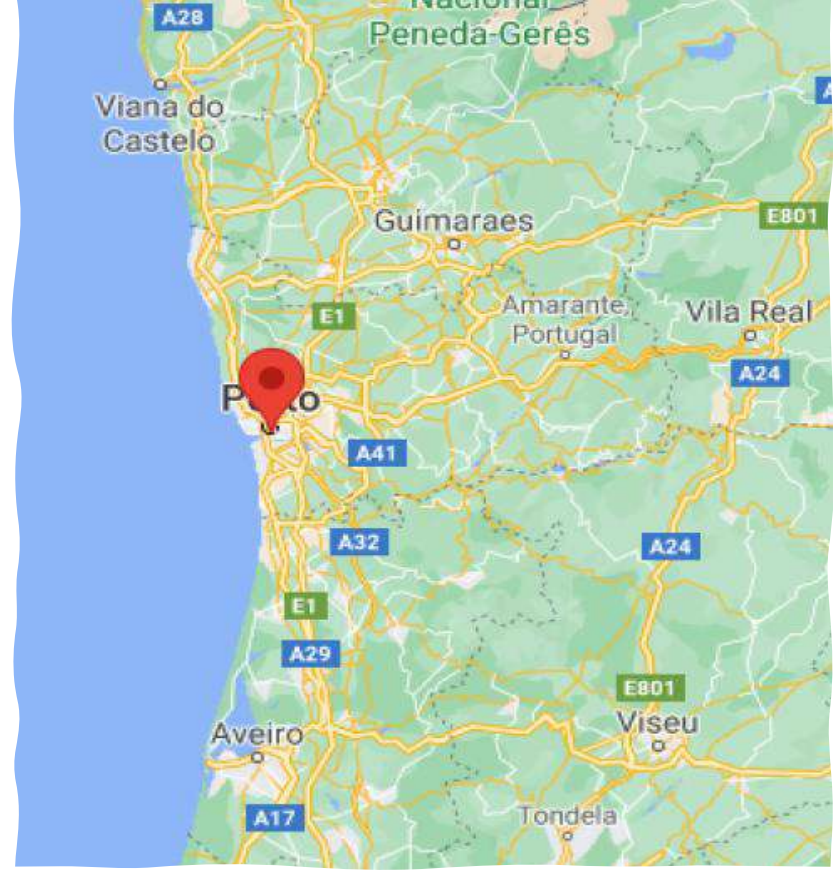

PORTUGAL

Portugal is a southern European country on the Iberian Peninsula, bordering Spain. Its location on the Atlantic Ocean has influenced many aspects of its culture: salt cod and grilled sardines are national dishes, much of the nation's architecture dates to the 1500s-1800s, when Portugal had a powerful maritime empire.

PORTO

Porto is the second city and the fourth most populous municipality in Portugal, located in the northwest of the country and capital of the Metropolitan Area of Porto, the Northern Region and the district of Porto. The city is considered a global gamma city. The municipality, with an area of 41.42 km², has a population of 237 591 inhabitants (2011) within its administrative limits, being subdivided into seven parishes.

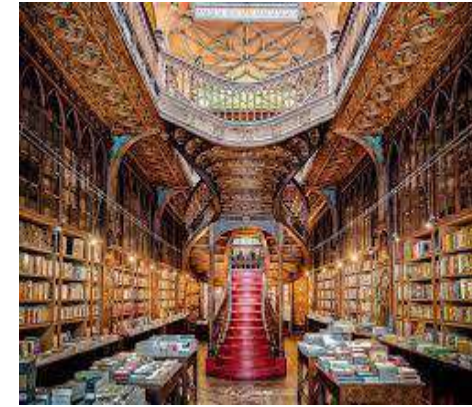

WHERE TO GO MONUMENTS

- Church and Tower of Clerics (one of the most important monuments in Porto and has a spectacular view over the city.)
- Monument Church of Saint Francis (one of the most antique and beautiful churches in Porto.)

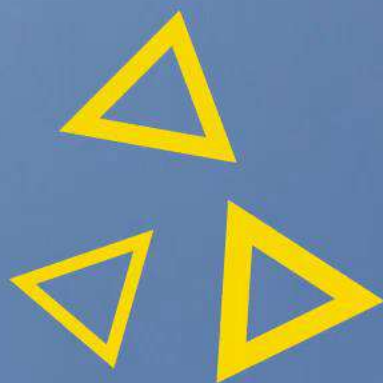

- Serralves Foundation (a Museum and park full of great and interesting exhibition.)
- Livraria Lello (a bookshop in the heart of Porto housed in a neo-gothic building from 1906)
- Luís I Bridge (iconic bridge and Porto's welcome gift.)
- Porto Cathedral (the most important church in Porto where students used together to sing.)

OUR SCHOOL

The Vocational School of Campanhã

OUR SCHOOL

230 students

25 teachers and pedagogical staff

13 classes

2 languages (English and French)

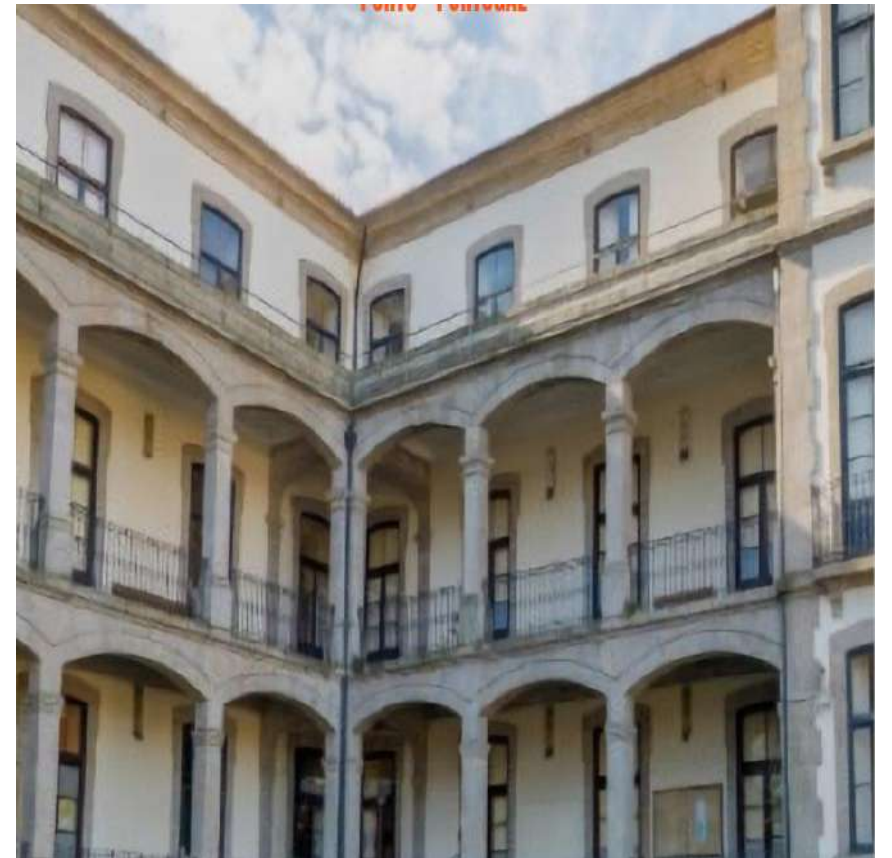

4 specialties:

- Multimedia
- Tourism
- Communication, marketing, public relations and publicity
- Management Informatics

OUR SCHOOL

- Inovated school
- Erasmus in KA1, KA2, VET School
- Accreditation coming soon
- Part of EQAVET network
- Educational-training business
- Connection with the business
- STEM activities

OUR SCHOOL

OUR SCHOOL

OUR SCHOOL

GENERAL INFORMATION

The school's main objective is to provide Vocational Education as well as to promote other forms of training meeting the interests and aspirations of young people, local development agents and the community in general, it also has the objective inserting young people into active life. In addition to this major objective, the EPC intends to:

- Contribute to the integral training of young people, providing them with adequate preparation for a qualified professional practice;
- To develop, through alternative modalities to those of regular education, mechanisms of approximation between the school and the world of work;
- Provide students with contacts with the world of work and professional experience, preparing them for an adequate socio-professional insertion;
- Promote, with other local agents and institutions, the implementation of a project to train qualified human resources that respond to the needs of the country's integrated development, particularly at the regional and local level;
- Provide students with a solid general, scientific and technological training, capable of preparing them both for entering the active life and for the pursuit of studies.

The school also participates in different national projects, from which highlight Eco-Schools and Escola Azul. The school has been recognized in some of the projects they participated in. At the international level, they participate in projects with several schools. The international projects that I highlight are e Safety and eTwinning, where they also have been recognized.

More About us... (Projects)

ESAFETY LABEL

eSafety Label is an initiative to the European Schoolnet. This initiative aims to provide the school community with good practices, attitudes and responsible behavior in the use of the internet, providing them with responsibility and knowledge of the "Digital Security" concept.

The aim of European Schoolnet is to provide Europe's schools and its wider ecosystem: a Europe-wide certification and support service, a digital environment and community.

In order to meet the needs of schools, of good technology management practices, the Ministry of Education and leading companies in the technological area join European Schoolnet in a multidisciplinary approach between partners.

Objective:

- Cause the debate on digital security.
- Know and understand many techniques and means of creating and transmitting content within the scope of digital security.
- Articulate the artistic, scientific and social dimension with confidence.
- Develop the ability to dialogue and promote creative teamwork.

ECO-SCHOOLS / YRE

Eco-Schools is an International Program that aims to encourage actions and recognize the quality work developed by the school, within the scope of Environmental Education/EDS.

Main objectives of the program:

- Provoke debate on environmental issues.
- Know and understand various techniques and means of creating and transmitting content within the scope of environmental education

Prizes:

"Galardão da Bandeira verde (2020/2021)" and today we are candidates for its renewal.

Some activities carried out:

EPCampanhã students paint gutters to raise awareness and remember the importance of not putting garbage on the floor

ECO-SCHOOLS / YRE

**GLOBAL
ACTION
DAYS**

Students from EPCampanhã participate in the cleaning of Rio Tinto promoted by Porto Mayor. Moment of learning and reflection/discussion on the Urban Water Cycle; The role of water courses that cross the city; The environmental degradation of streams; What should we do to improve these water resources;

Construction of the Insect Hotel for the school

Simulacrum
TERRA TREME is an exercise organized annually by the National Emergency and Civil Protection Authority. It intends to alert and sensitize the population on how to act before, during and after the occurrence of an earthquake.

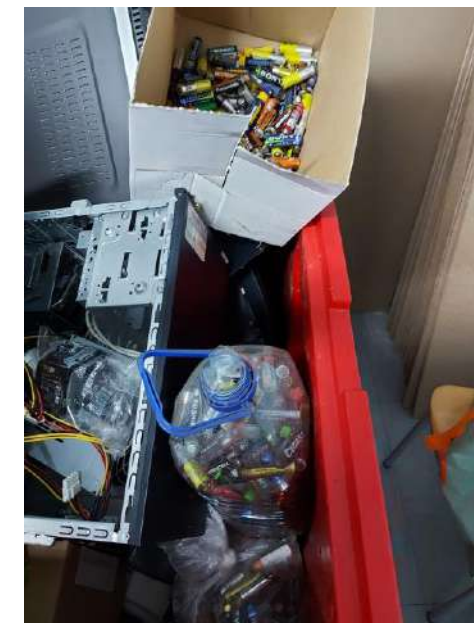

ECO-SCHOOLS / YRE

Our vertical or suspended organic vegetable garden comes as part of the school's participation in various environmental sustainability projects. Students and teachers share knowledge in planting small, diverse crops

Global Action Days Activities:

Escola Electrão aims to raise awareness of the community in general, in the recycling effort, with the collection of electrical equipment and used batteries.

Eco Brigades, Garbage Separation

ECO-SCHOOLS / YRE

Young Reporters for the Environment (YRE)

Is an international program of the Foundation for Environmental Education implemented in Portugal by, which aims to contribute to the training of an active and participatory citizenship, emphasizing the aspect of environmental journalism.

Young people research (through interviews, surveys, etc...) and interpret locally relevant environmental/sustainability issues as if they were journalists, reinforcing their knowledge of the environment, foreign languages and new technologies and communication techniques

Reports made:

"Serralves, um lugar cheio de vida" (Inês Amaral, Daniel Monteiro)

"Tecnologia, jogos e ambiente" (Inês Amaral)

"A Central Eólica do Caramulo: Uma das maiores centrais do país" (Lara Moreira)

"Intercâmbio entre escolas pelo ambiente" (Marcos Fernandes)

Photo reports:

"O mundo de plástico" (Mariana Araújo)

ECO-SCHOOLS / YRE

Young Reporters for the Environment (YRE)

A work of our Young Reporters for the Environment together with colleagues from METU DF Schools Mersin from Turkey within the scope of the Young Reporters for the Environment International Competition

ESCOLA-AZUL

Ano Letivo 2020/2021 – Galardão Bandeira Azul

Escola Azul is an educational program of the Ministry of the Sea, developed at the Directorate-General for Sea Policy, whose mission is to promote Ocean Literacy in the school community and create more responsible and participatory generations that contribute to the sustainability of the Ocean.

The Escola Azul program also integrates multidisciplinary marine education actions in a diversified network of partners aimed at the Blue Schools

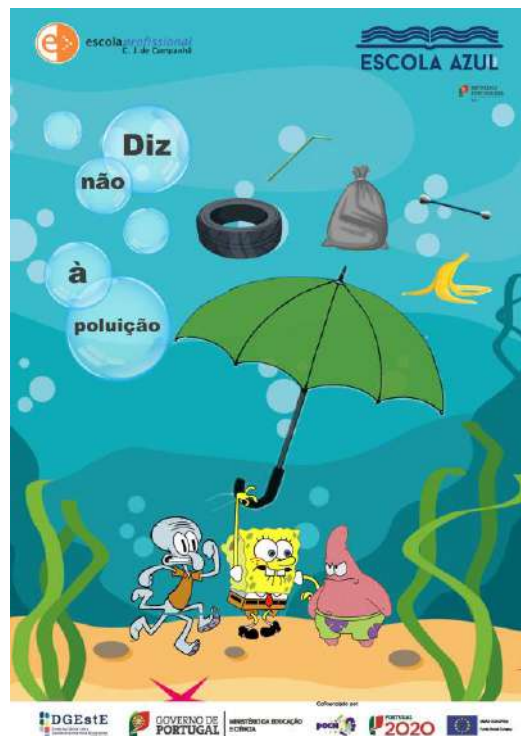

Objetives:

- Provoke the debate on Ocean Literacy.
- Know and understand various techniques and means of creating and transmitting content within the scope of the sustainability of the Ocean.
- Develop the ability to dialogue and promote creative teamwork.

ESCOLA-AZUL

MAPEAR

The MAPEAR project - Collaborative Environmental Mapping of Air and Noise Quality is financed by the Environmental Fund - quality Health line and sustainable cities and communities - and aims to promote socio-environmental literacy in the school community on the impacts of noise and of air pollution on urban and human metabolism, whose mitigation and elimination are directly associated with the SDGs «3. Quality health” and “11. Sustainable Cities and Communities».

mapear

Mapeamento ambiental colaborativo
da qualidade do ar e ruído

The screenshot shows the 'Particulate Matter App' interface. On the left, there is a QR code for linking with the Android app. Below the QR code, it says 'Link with android app' and 'To synchronize your sensors and your favorites, start the Particulate Matter App.' On the right, there is a map of northern Portugal with several blue location pins. A red arrow points to a specific pin labeled 'EPCJC Sensor ID: 2380747' near Porto. At the bottom, it says 'Three dots at the top right corner -> Web version' and '© ChiliBits - 2018 - 2021'.

GERAÇÃO +

The Geração+ Project is an educational project, aimed at Public and Private Education Institutions, as well as Social Area Institutions or other Associations and Entities, based in the Associated Municipalities and wishing to change their environmental management practices. Respect for the environment forces us to reflect on behavior and to adopt a set of practices, which, when taken together, translate into a positive impact on the environment. We promote citizens' commitment to good environmental practices, facilitating the acquisition of skills that promote greater civic intervention, making them capable of fueling the growth and consolidation of environmentally responsible and sustainable processes.

Our vertical or suspended organic vegetable garden comes as part of the school's participation in various environmental sustainability projects.

Dissemination of the project in the Educational Community

Reuse and transform plastic into new parts. Plastic reuse workshop with VIVALab

GERAÇÃO +

ETWINNING

Examples of developed projects

Xtreme addictions: (+ 10 schools)

In this project we would like to talk about addictions which, although not raised officially, are very serious and dangerous for our health, like being addicted to technologies (e.g. gaming), orthorexia/bigorexia, toxic relationships, on-line gambling, body modifications (tattoos and piercing) or addiction to energetic drinks. Our aim is to make students more conscious about the dangers connected with addictions, not really here and now. Students are going to name the addictions and analyse these dangers.

ETWINNING

Media Literacy & Digital Friendships (+ 13 schools)

This is an awareness raising and educative project which will:

- Ensure that students are media literate
- Create and develop the interdisciplinary links: English and IT, Media, HR
- Orient students in the diverse job/career world as well as relating to employment in media literacy
- Aim at using web.2 tools
- Provide language development, proficiency and flexibility
- Develop their communicative, digital and self management skills (participating, sharing, cooperation and teamwork).
- Present the similarities and differences among the cultures.
- Keep aware of digital world and how media is important for them.

ETWINNING

Entrepreneurial Career Workshop (11 escolas)

The Entrepreneurial Career Workshop aims to contribute to the development of innovative and productive individuals who are respectful to national and international competence, professional ethics and professional values. This project aims to increase personal and professional skills. In addition to giving new age skills and design-oriented thinking, there will be also activities about professional ethics, solidarity, occupational health and safety, entrepreneurial ideas, business establishment and business conduct. During the project, students will be supported to use web 2 tools and activities will be held in accordance with these gains.

Others exemples of developed projects:

- World English on Click
- A profile photo
- Show Me Your Nature!

ERASMUS +

Erasmus+ is the European program that supports education, training, youth and sport. The 2021-2027 program places a strong emphasis on social inclusion, ecological and digital transitions and promoting youth participation in democratic life. Supports the priorities and activities set out in the European Education Area, the Digital Education Action Plan and the Skills Agenda for Europe

ENNE is a European project that supports the creation of 5 national networks of VET providers - Vocational Education and Training - in 5 different countries (Italy, Bulgaria, Germany, Portugal and Belgium).

This project will promote the improvement of the quality and attractiveness of VET, with a specific focus on mobility opportunities.

OUR ERASMUS EXPERIENCE

Experience with Job shadowing, KA1 / KA2 and other International Mobility

Job Shadowing for VET Staff:

Vito Gurrado

(Teacher at Istituto Superiore Alfonso Casanova, in Naples)

Other International Mobility:

Sergio Ferrer

IES Clara del Rey

Experience Erasmus projects:

Italy (Foligno, Catania)

Bulgary (Varna, Sofia and Yambol)

More International Mobility Experience:

Bélgica (Brussels)

WBL EXPERIENCES ABROAD FOR VET LEARNERS

The Vocational School of Campanhã is present at the Erasmus + ENNE project Workshop in Foligno, Italy. The project aims to improve the quality and social image of vocational education with a focus on internationalization and mobility opportunities for students and teachers.

JOB SHADOWING FOR VET STAFF

Our teacher at the Vocational School at Campanhã are hosted by Liceo Majorana, based in Italy

JOB SHADOWING FOR VET STAFF

Vito Gurrado, a teacher at Institute Superiore Alfonso CasaNova, in Naple
Covis19 pandemic, how did schools manage the situation? How are schools managing? Teaching experiences in Italy during the pandemic.

JOB SHADOWING FOR VET STAFF

IES Clara Del Rey, Madrid-Spain visits our school to share experiences and new Erasmus partnerships.

The teacher Sergio Ferrer, made an presentation about the theme "Didactic experiences in Spain (internship/ training).

We accompanied the teacher to some of the main internship entities in the area of tourism and multimedia, in order to facilitate and promote future partnerships between the school that Professor Sergio represents and the entities presented

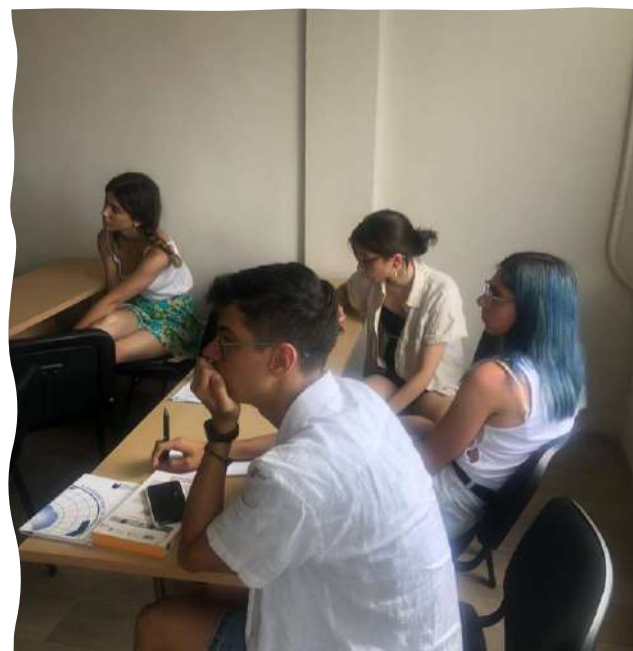

WBL EXPERIENCES ABROAD FOR VET STUDENTS

ENNE programme

10 days of experiences, sharing, training in
Varna, Bulgaria

Training about Tourism subjects

4 students

ENNE QSA WORKSHOP IN SOFIA

International Training course on Quality Assurance System for our members: 5 days, 25 hours of face to face workshop, 5 VET professionals coming from the 5 project countries
